No collapsible table is easier to handle than Flip. The table design focuses on light weight and high flexibility.

By employing the so-called honeycomb technique, Hans Sandgren Jakobsen has created an unusually lightweight tabletop, which at the same time is very stiff.

The specially developed couplers enable the table to be extended in all directions.

Flip is available in a range of sizes in both folding and fixed-leg versions, with three different types of legs to choose from.

Optional features include protective rubber edging, chair suspension brackets and modesty panels with cabling for use in auditoriums.

For mobility, Sandgren Jakobsen has designed a transport cart which can carry up to eight folded tables.

**Available in birch, beech, maple, cherry and white or black laminate,**
