Prime Time is a lounge chair just made for sinking into and enjoying the best moments of the day. The chair's distinctive features are the curved seat and back that comfortably support the body in a relaxed position. The chair allows numerous sitting options and is also large enough to seat an adult and child simultaneously.

Prime Time comes with loose, reversible cushions and removable covers. The chair consists of a steam-bent shell in beech, birch walnut and leached oak, with a swivel frame as standard. Loose decorative cushions are available for the chair. The Prime Time series also includes a matching footstool in the same woods as the chair, with loose cushions.
