The shape of a guitar pick has given this stackable bar stool its characteristic appearance. The turned-up back edge of the padded seat gives a feeling of support and in addition offers somewhere to hang one's bag or jacket. The seat is covered in fabric or leather and upholstered over a one piece form crafted from PUR, a black rubber-like material . A seat that's particularly durable.

The frame of the stool in chrome permits stacking, which is very unusual for a bar stool. Very practical in tight spaces and when extra chairs are needed.
