The Aspen bar stool is flexible seating in two senses. The soft-shaped fabric or leather padded seat allows you to sit in two different ways. Straddle the stool, as most men prefer, or sit with legs together, as most women prefer.

Aspen is available in two heights, with the "Grande" bench version being lower and broader, inviting two people to sit together either back to back or side by side. The frame is made of mirror chrome plated steel. Aspen has been included in the Stockholm National Museum's modern design collection.
