

Concert Pendant Fixture

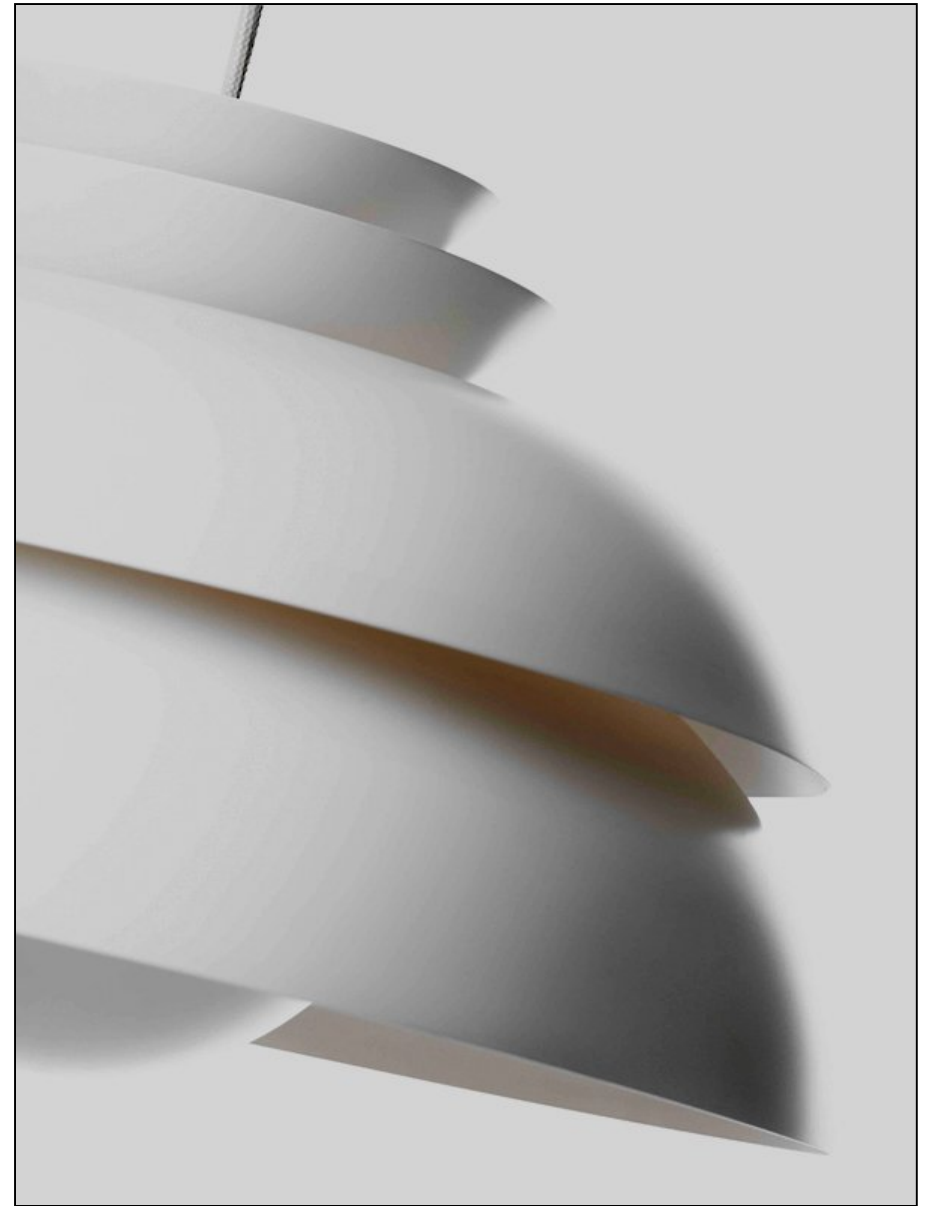

"IT IS MATTER OF OPENING YOURSELF TO THE ESSENCE OF THINGS, RATHER THAN STRUGGLING FOR FORM AND STYLE"

Creating things for people. This is the primal theme of probably Denmark's most famous architect of all time: Jørn Utzon.

His career culminated in 1957 when he won the international architectural competition for the Sydney Opera House. It is a thoroughly ingenious work that justifiably made him an icon of 20th Century architecture.

In developing his designs for Lightyears, Jørn Utzon has worked to ensure that light constantly promotes the atmosphere of a room, whether it is used for cozy togetherness, for a particular function or for sheer inspiration.

The designs of his first lamp for Lightyears draw a golden thread from the Sydney Opera House. It completes the picture of Jørn Utzon as a lamp designer and architect of highest international stature.

Concert is a natural choice in conference rooms, auditoriums, lobbies and other large rooms in which soft, indirect lighting is required.

Concert consists of four shades that repeat the same form in various sizes, reflecting each other in pairs. Thanks to the larger dimensions, the distance between the four shades has been increased correspondingly – increasing the light emitted between the shades and enveloping the pendant in a warm, soft light that underlines the form of the lamp more than ever before. The result speaks for itself.

The shades are easy to detach and clean without taking down the pendant. **UL Approved.**

Concert

		LIST
CON100	Concert Pendant Fixture (P1) UL Approved Diameter 12 ½ H 6 ¾ 75W	450
CON300	Concert Pendant Fixture (P3). UL Approved. Diameter 21 ¾ H 12 ¾ 200W	995
