

## Contact - Flip Top Tables

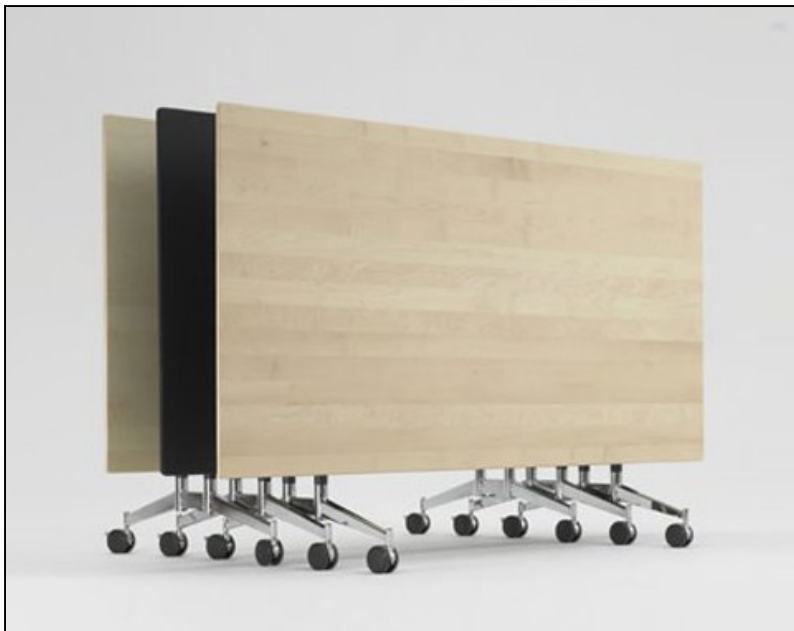

In the work-related every day life the demand for flexibility grows. For this purpose the mobile Contact table was created, fitted with wheels and stackable horizontally when the table top is raised - without lifting or using any strength, obtaining an optimal use of the functions of the room.

The transverse base is in mirror chrome - the supporting tubes in bright or satin chrome or epoxy lacquered.

The table top is available in black lacquer with soft touch effect or with wooden edgings: beech, maple, oak or cherry and surface in various laminate colors or wood veneer.

A complete table program has now been developed with table tops in various rectangular and curved forms and with two different bases: for mobile tables with casters or stationary with protective glides.

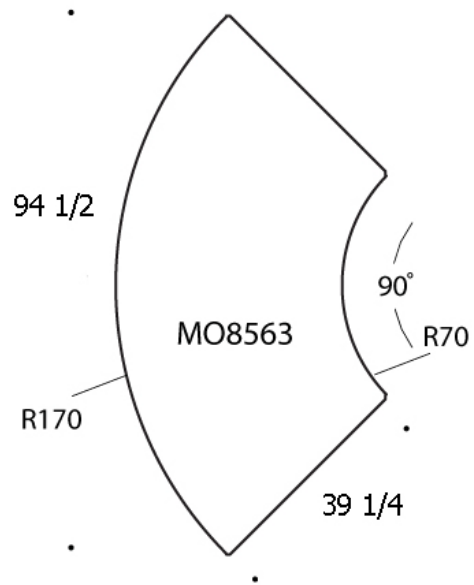

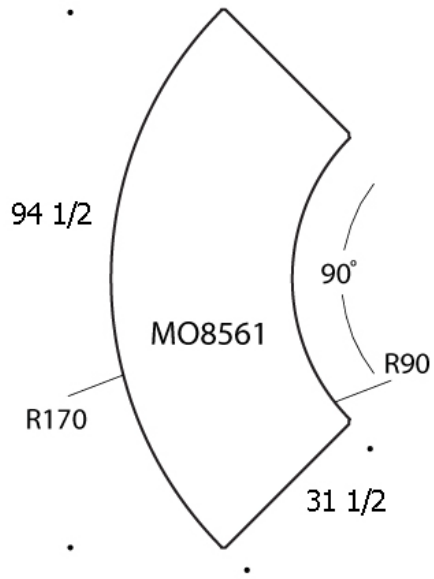

Accessories are available for the table such as wire management tray, modesty panel and linking device.
