Fat is a strong modern bench suitable for shops, galleries, schools, healthcare environments and offices.

Environments where you wish to convey a feeling of outdoors and indoors. The very pronounced clarity of the design makes the Fat the archetypal item of furniture for the purpose.

The robust construction provides durability for use in heavy duty working environments. Great emphasis has been placed on sitting comfort, the angle of the back boards providing pleasing support for the back. Fat is available with or without a back. Indoor use only.
