Wooden shells

Wooden shells (made of laminate with a lacquered surface) offer good seating comfort, a range of elegant wood finishes - and easy maintenance.

General cleaning:

Wipe the shell with a clean cloth wrung out in hot water with a mild cleaning detergent. Afterwards, wipe the shell with a clean, dry cloth to avoid stripes or blotches.

Polyamide shells

Four Design polyamide shells offer good seating comfort, a wide range of elegant and refreshing colours - and easy maintenance.

General cleaning:

Wipe the shell with a clean cloth wrung out in hot water with a mild cleaning detergent. Afterwards, wipe the shell with a clean, dry cloth to avoid stripes or blotches.

Thorough cleaning:

Difficult stains may require a more powerful detergent or solvent. Prior to cleaning, always test the detergent/solvent in an invisible spot (underneath the chair seat) to ensure that it will not damage the surface of the shell.

Metal surfaces

The most commonly used metals in furniture production today are aluminium and chrome plated, stainless or painted steel. All these surfaces have a good resistance to dirt and liquids.

General cleaning:

Wipe with a cloth dipped in water containing dishwashing liquid. Afterwards, wipe the surface with a clean, dry cloth to avoid stripes or blotches.

Thorough cleaning:

Aluminum, chrome and stainless steel can be wiped with a cloth dampened with denaturated alcohol. Colored marks from shoes and the like can most often be removed with benzine.

Caution: Flammable - remember ventilation and suitable safety equipment.
