

Juicy

H 17.5" Diameter 17.25"

The Juicy pendant is an elegant modern pendant comprised of three components (wire, cone and shade) that fit smoothly together to create a striking whole.

A subtle poly carbonate ring breaks the surface as the cone meets the shade, allowing light to illuminate the surface of the pendant. Finished off with a honeycomb diffuser to concentrate and soften the light, creating a warm and inviting glow-- regardless of whether you use a traditional low-energy light source or the newest LED alternatives.

6m cord standard in matching color
