The Natura bar stool is made of solid birch or oak, and is available in two heights, and as a low stool. The seat is made of woven nylon belt-band in black, silver-grey or blue. The nylon belt-band, the same as that normally used for safety belts, does not stretch and is easy to wipe clean. The seat can also be upholstered in Elmosoft leather with a row of leather-covered buttons decorating the seat. The back support/handle and foot rest can be specified in black or silver-grey.
